Stratospheric Chemistry, 7.12.2006

Thomas Kuster Influence of NO_x on O₃ Content

Outline

- 1 Prof. Paul Jozef Crutzen
 - Personal, Academic Studies
 - Noble Prize
- 2 Chemistry
 - Balance of O₃
 - Change of Odd Oxygen
- 3 Impact
- 4 Discussion
- 5 Appendix
 - List of figures
 - Bibliography

Thomas Kuster Influence of NO_x on O₃ Content

Paul Jozef Crutzen

Personal

- Born December, 3, 1933 in Amsterdam Holland
- Married, two children

Academic Studies

- Civil Engineering, 1951–1954, Amsterdam, Holland.
- Academic Studies and Research Activities 1959–1973 at the University of Stockholm, Sweden.

Thomas Kuster

Influence of NO_x on O₃ Content

The Nobel Prize in Chemistry 1995

"for their work in atmospheric chemistry, particularly concerning the formation and decomposition of ozone"

Paul Jozef Crutzen
*1933
the Netherlands

Mario José Molina
*1943 (Mexico City)
USA

F. S. Rowland
*1927
USA

Thomas Kuster

Influence of NO_x on O₃ Content

Balance of O₃

Odd Oxygen

- balance between atomic oxygen and ozone
- reaction is too slow to balance the O₃
- Equation: (5), (7), (8)

OH and HO₂

- destruction of ozone by OH or HO₂
- this hypothesis does not explain the ozone observation
- Equation: (14), HO₂ + O₃ not used (very speculative)

Odd Nitrogen (NO and NO₂)

- direct controlling effect on the ozone \Rightarrow controlling the ozone production rates
- Equation: (1), (2), (3)

Thomas Kuster

Influence of NO_x on O₃ Content

Odd Oxygen

Reactions

Rate Constants

$$k_5 = 8 \cdot 10^{-35} e^{(445/T)} \frac{\text{cm}^3}{\# \text{s}} \quad k_5 : k_0^{300} = 6.0 \cdot 10^{-34}, n = 2.4$$

$j_7 = ?$

$$j_8 = ? \quad j_8 = 7.8 \cdot 10^{-3} \frac{1}{\text{s}}$$

left: [Crutzen, 1970], right: [Sander, 2006] & [Brasseur & Solomon]

Thomas Kuster

Influence of NO_x on O₃ Content

OH and HO₂

Reactions

Rate Constants

$$k_{14} = 10^{-13} \frac{\text{cm}^3}{\#\text{s}} \quad k_{14} = 1.7 \cdot 10^{-12} \exp(-940/T) \frac{\text{cm}^3}{\#\text{s}}$$

$$k_{31} : \text{not used} \quad k_{31} = 1.0 \cdot 10^{-14} \exp(-490/T) \frac{\text{cm}^3}{\#\text{s}}$$

left: [Crutzen, 1970], right: [Sander, 2006]

Odd Nitrogen (NO and NO₂)

Reactions

Rate Constants

$$k_1 = 1.7 \cdot 10^{-12} \cdot e^{-1310/T} \frac{\text{cm}^3}{\#\text{s}} \quad k_1 = 3.0 \cdot 10^{-12} \cdot e^{-1500/T} \frac{\text{cm}^3}{\#\text{s}}$$

$$j_2 = 5 \cdot 10^{-3} \frac{1}{\text{s}} \quad j_2 = 1 \cdot 10^{-2} \frac{1}{\text{s}}$$

$$k_3 = 3.2 \cdot 10^{-11} \cdot e^{-530/T} \frac{\text{cm}^3}{\#\text{s}} \quad k_3 = 5.1 \cdot 10^{-12} \cdot e^{210/T} \frac{\text{cm}^3}{\#\text{s}}$$

left: [Crutzen, 1970], right: [Sander, 2006] & [Brasseur & Solomon]

Change of Odd Oxygen (O and O₃)

Time Rate

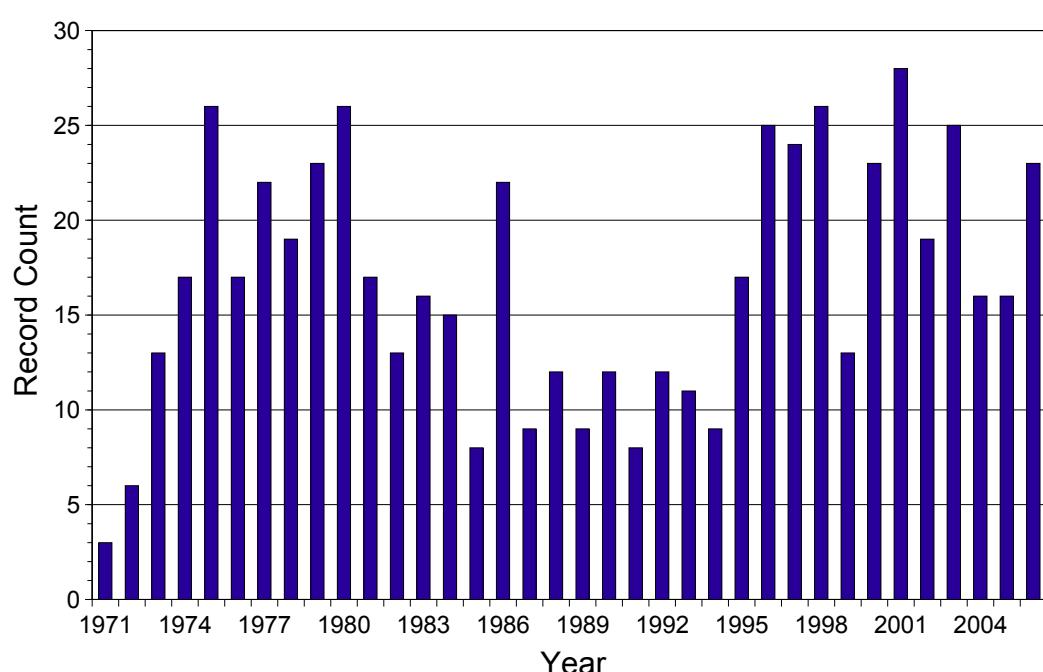

$$\frac{d}{dt} [\text{O}_x] = + \underbrace{2j_4[\text{O}_2]}_P - \underbrace{2k_3[\text{O}][\text{NO}_2]}_{D_1} - \underbrace{\{(k_{11}[\text{O}] + k_{14}[\text{O}_3])[\text{OH}] + k_{13}[\text{O}][\text{HO}_2]\}}_{D_2} - \underbrace{2k_6[\text{O}][\text{O}_3]}_{D_3} \quad (22)$$

Influence of NO_x on O₃ Content

Impact

Record Count (total 600 times cited)

Thomas Kuster

Influence of NO_x on O₃ Content

Discussion

- Nitrogen oxides are of great importance in ozone photochemistry
- Observations of the nitrogen oxides in the stratosphere
- Sources of N₂O
- Photodissociation products of N₂O
- Most of the NO and NO₂ is produced at very high levels, influence by solar cycle?
- What products are formed in the photolysis of ozone below 234 nm?
